Microsoft Taiwan

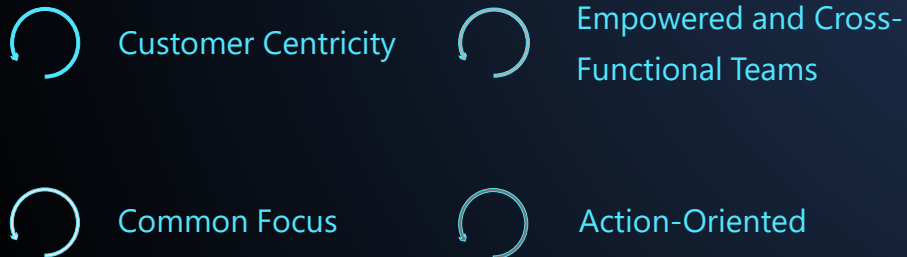

# Differentiating Agility and Scrum

## Agility

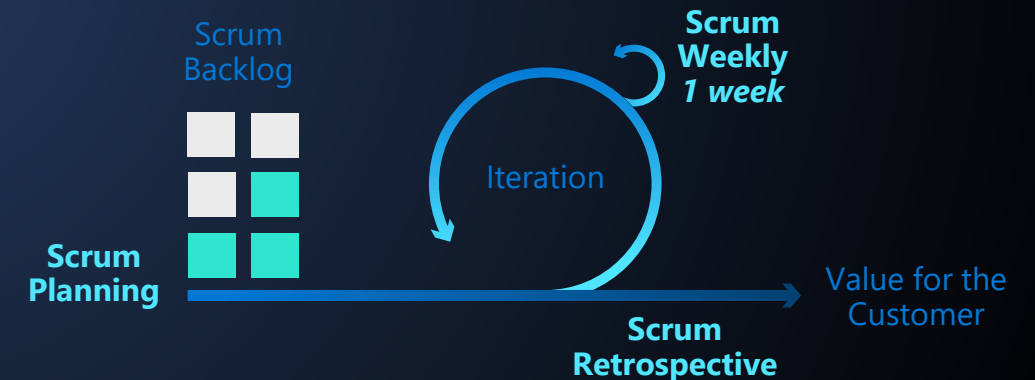

"The ability to create **value** and to **continuously delight the customer**, while promoting and responding to changes in its environment."

A living approach that must be tailored to Microsoft's culture.  
These 4 pillars are the ground base of the Agile culture @Microsoft.

## Scrum

"A **framework** for **project management**. It emphasizes teamwork, accountability and iterative progress towards a well-defined goal."

# One Engineering System for DevOps

There cannot be a more important thing for an engineer, for a product team, than to work on the systems that drive our productivity.

So I would, any day of the week, trade off features for our own productivity.

I want our best engineers to work on our engineering systems, so that we can later on come back and build all of the new concepts we want.

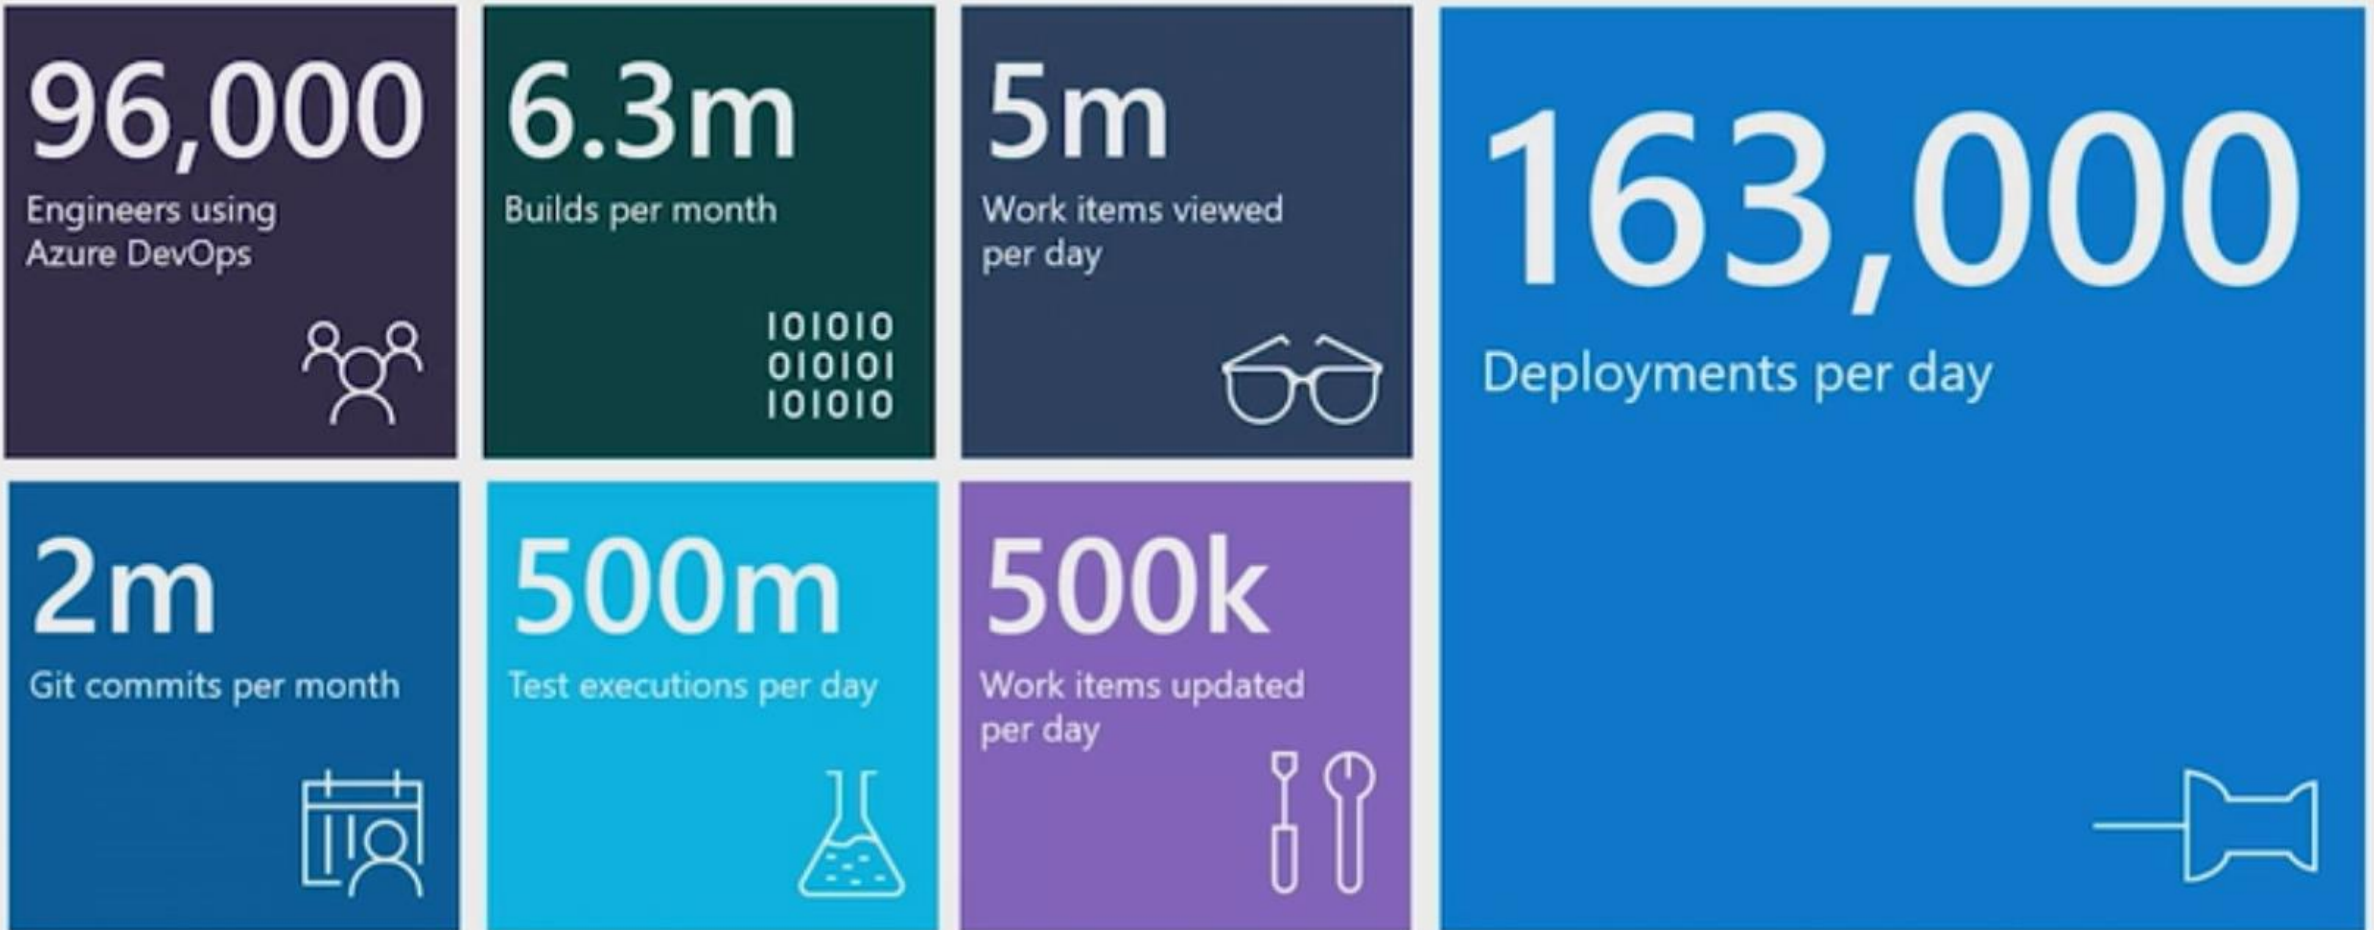

- Satya Nadela

# DevOps in Microsoft

Azure DevOps is the toolchain of choice for Microsoft engineering with over 96,000 internal users

DevOps 是人、流程和技術的結合，用來對最終用戶持續得交付價值

## 計畫和追蹤

敏捷規劃  
儀錶板  
看板  
Taskboards

## 開發和測試

Git 原始程式碼管理  
現代代碼工作流  
連續集成  
連續測試  
套件管理  
開源法規遵從性

## 監測和維運

遙測  
診斷  
分析  
合規

## 部署

應用程式和基礎架構的部署  
PaaS、IaaS 和容器

Microsoft DevOps Solution

Azure DevOps Services & Azure DevOps Server

# Azure DevOps

## Azure Boards

使用經實證的敏捷式工具與所有小組一起規劃、追蹤及討論工作，更快傳遞價值給您的使用者。

## Azure Test Plans

使用手動與探勘測試工具放心測試及交付。

## Azure Pipelines

以適用於任何語言、平台和雲端的 CI/CD 建置、測試及部署。連線到 GitHub 或任何其他 Git 提供者並持續部署。

## Azure Artifacts

建立、裝載套件並與您的小組共用，只要按一下即可將成品新增至您的 CI/CD 管線。

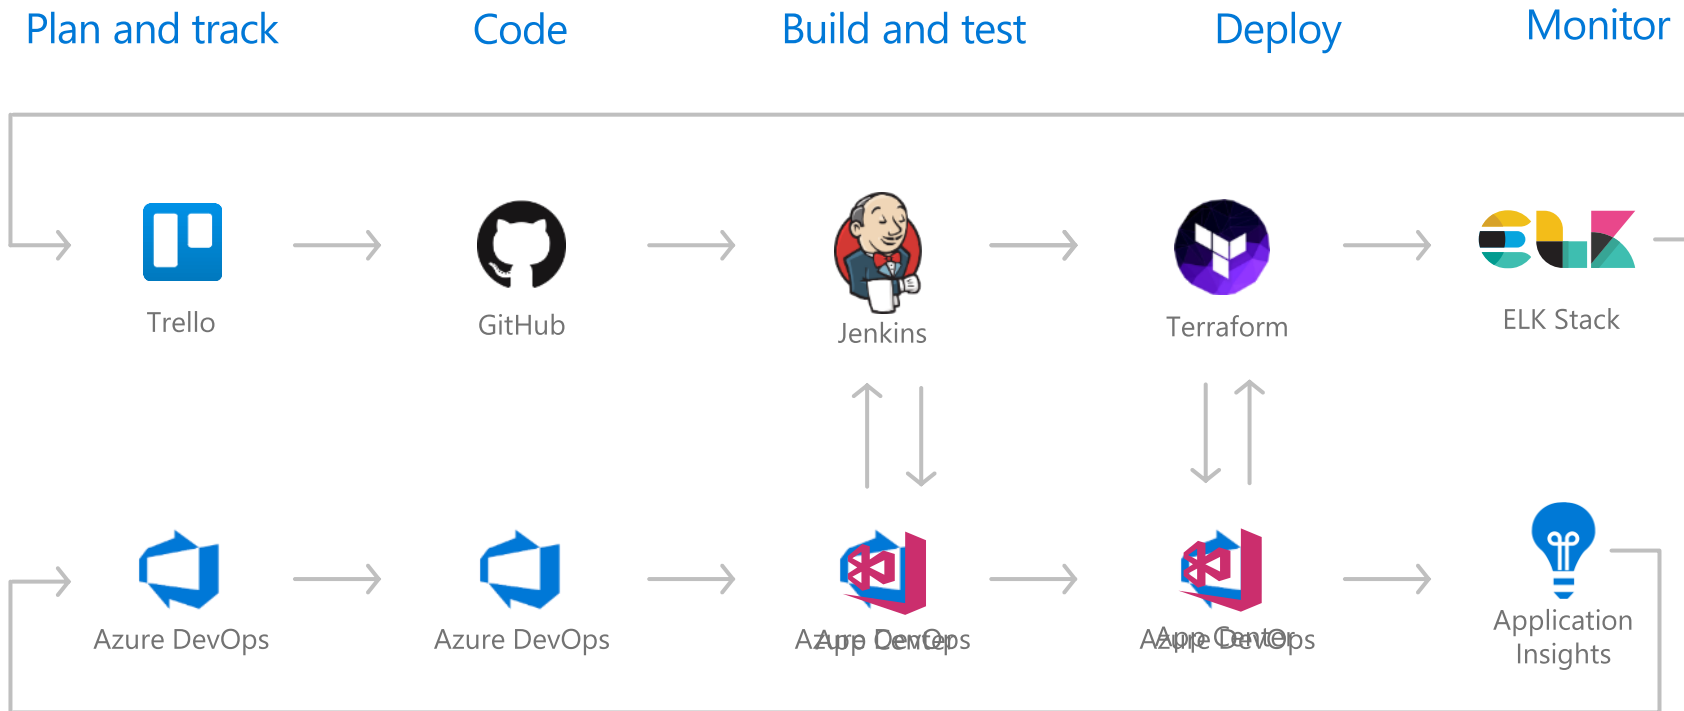

## Azure Repos

取得無限的雲端託管私人 Git 存放庫，並透過提取要求和進階檔案管理來共同作業以建置更佳的程式碼。

# DevOps Flow

# Build – Continuous Integration

# Continuous integration / CI

Decline the error rate on compiling after source code check in

Fully automatic Integration and Unit test task

Connection with code analysis

# 常用 Build Task

 **.NET Core**  
Build, test, package, or publish a dotnet application, or run a custom dotnet command. For package commands, supports NuGet.org and authenticated feeds like Package Management and MyGet.

 **Gradle**  
Build using a Gradle wrapper script

 **Maven**  
Build with Apache Maven

 **Ant**  
Build with Apache Ant

 **Python Script**  
Run a Python script.

 **React Native Prepare**  
Prep a React Native project to avoid build hangs for i to use the right version of Node.js when generating an bundle.

 **React Native Bundle**  
Generate an offline bundle for a React Native project.

 **Go**  
Get, build, or test a Go application, or run a custom command.

 **Android Signing**  
Sign and align Android APK files

 **Xcode**  
Build, test, or archive an Xcode workspace on macOS. Optionally package an app

 **Visual Studio Test**  
Run unit and functional tests (Selenium, Appium, Coded UI test, etc.) using the Visual Studio Test (VsTest) runner. Test frameworks that have a Visual Studio test adapter such as MsTest, xUnit, NUnit, Chutzpah (for JavaScript tests using QUnit, Mocha and Jasmine), etc. can be run. Tests can be distributed on multiple agents using this task (version 2).

 **MSBuild**  
Build with MSBuild

 **Visual Studio Build**  
Build with MSBuild and set the Visual Studio version property.

 **PowerShell**  
Run a PowerShell script on Windows, macOS, or Linux.

 **Command Line**  
Run a command line script using cmd.exe on Windows, bash on macOS and Linux.

 **Azure PowerShell**  
Run a PowerShell script within an Azure environment

 **npm**  
Install and publish npm packages, or run an npm command. Supports npmjs.com and authenticated registries like Package Management.

 **NuGet**  
Restore, pack, or push NuGet packages, or run a NuGet command. Supports NuGet.org and authenticated feeds like Package Management and MyGet. Uses NuGet.exe and works with .NET Framework apps. For .NET Core and .NET Standard apps, use the .NET Core task.

 **CocoaPods**  
CocoaPods is a dependency manager for Swift and Objective-C Cocoa projects. This task runs 'pod install'.

 **Python Pip Authenticate**  
Authentication task for pip client used for installing python distributions.

 **Archive Files**  
Archive files using compression formats such as .7z, .rar, .tar.gz, and .zip.

 **Publish Build Artifacts**  
Publish build artifacts to Azure Pipelines/TFS or a file share

# Frequently Ask

- 編譯過程很複雜而且很多非基本流程，Azure DevOps 可以做到嗎？
  - 原則上，如果編譯的流程都可以透過 command 的方式完成，都能在Azure DevOps上執行
- Security Issue ?
  - 處理編譯(Build)和部屬(Release)的機器，在Azure DevOps上有兩種選擇：
    - MS Host Agent：Windows/Ubuntu/MacOS  
<https://docs.microsoft.com/en-us/azure/devops/pipelines/agents/hosted?view=azure-devops&tabs=yaml>
    - Self Host Agent

# Release – Continuous Delivery

# 應用程式部屬上會遇到 ...

## 複雜且多樣的部署環境

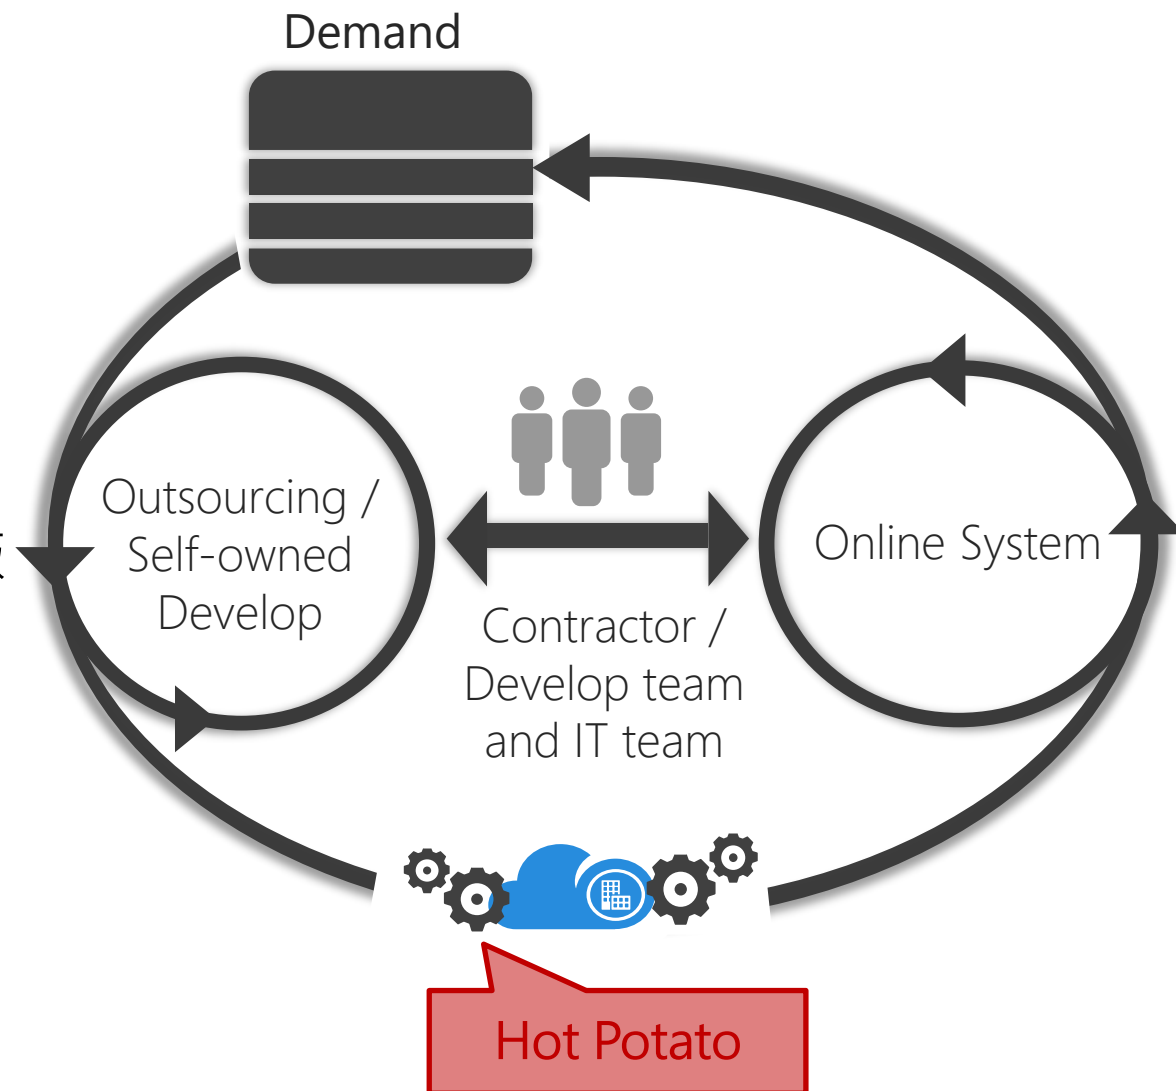

- .NET, Java ...
- Web, DB, Production, Staging
- Windows, Linux, On-premises server, Cloud

## 系統部屬環境準備費時

- 公司可能會有上百上千個系統，每天都會有新的版本需要做部屬
- 手動部屬、跨組織跨 team 溝通、工作交接而產生的 issue

## 稽核、公司內部政策考量

- 如何做 Security 的控管
- 災難備援機制

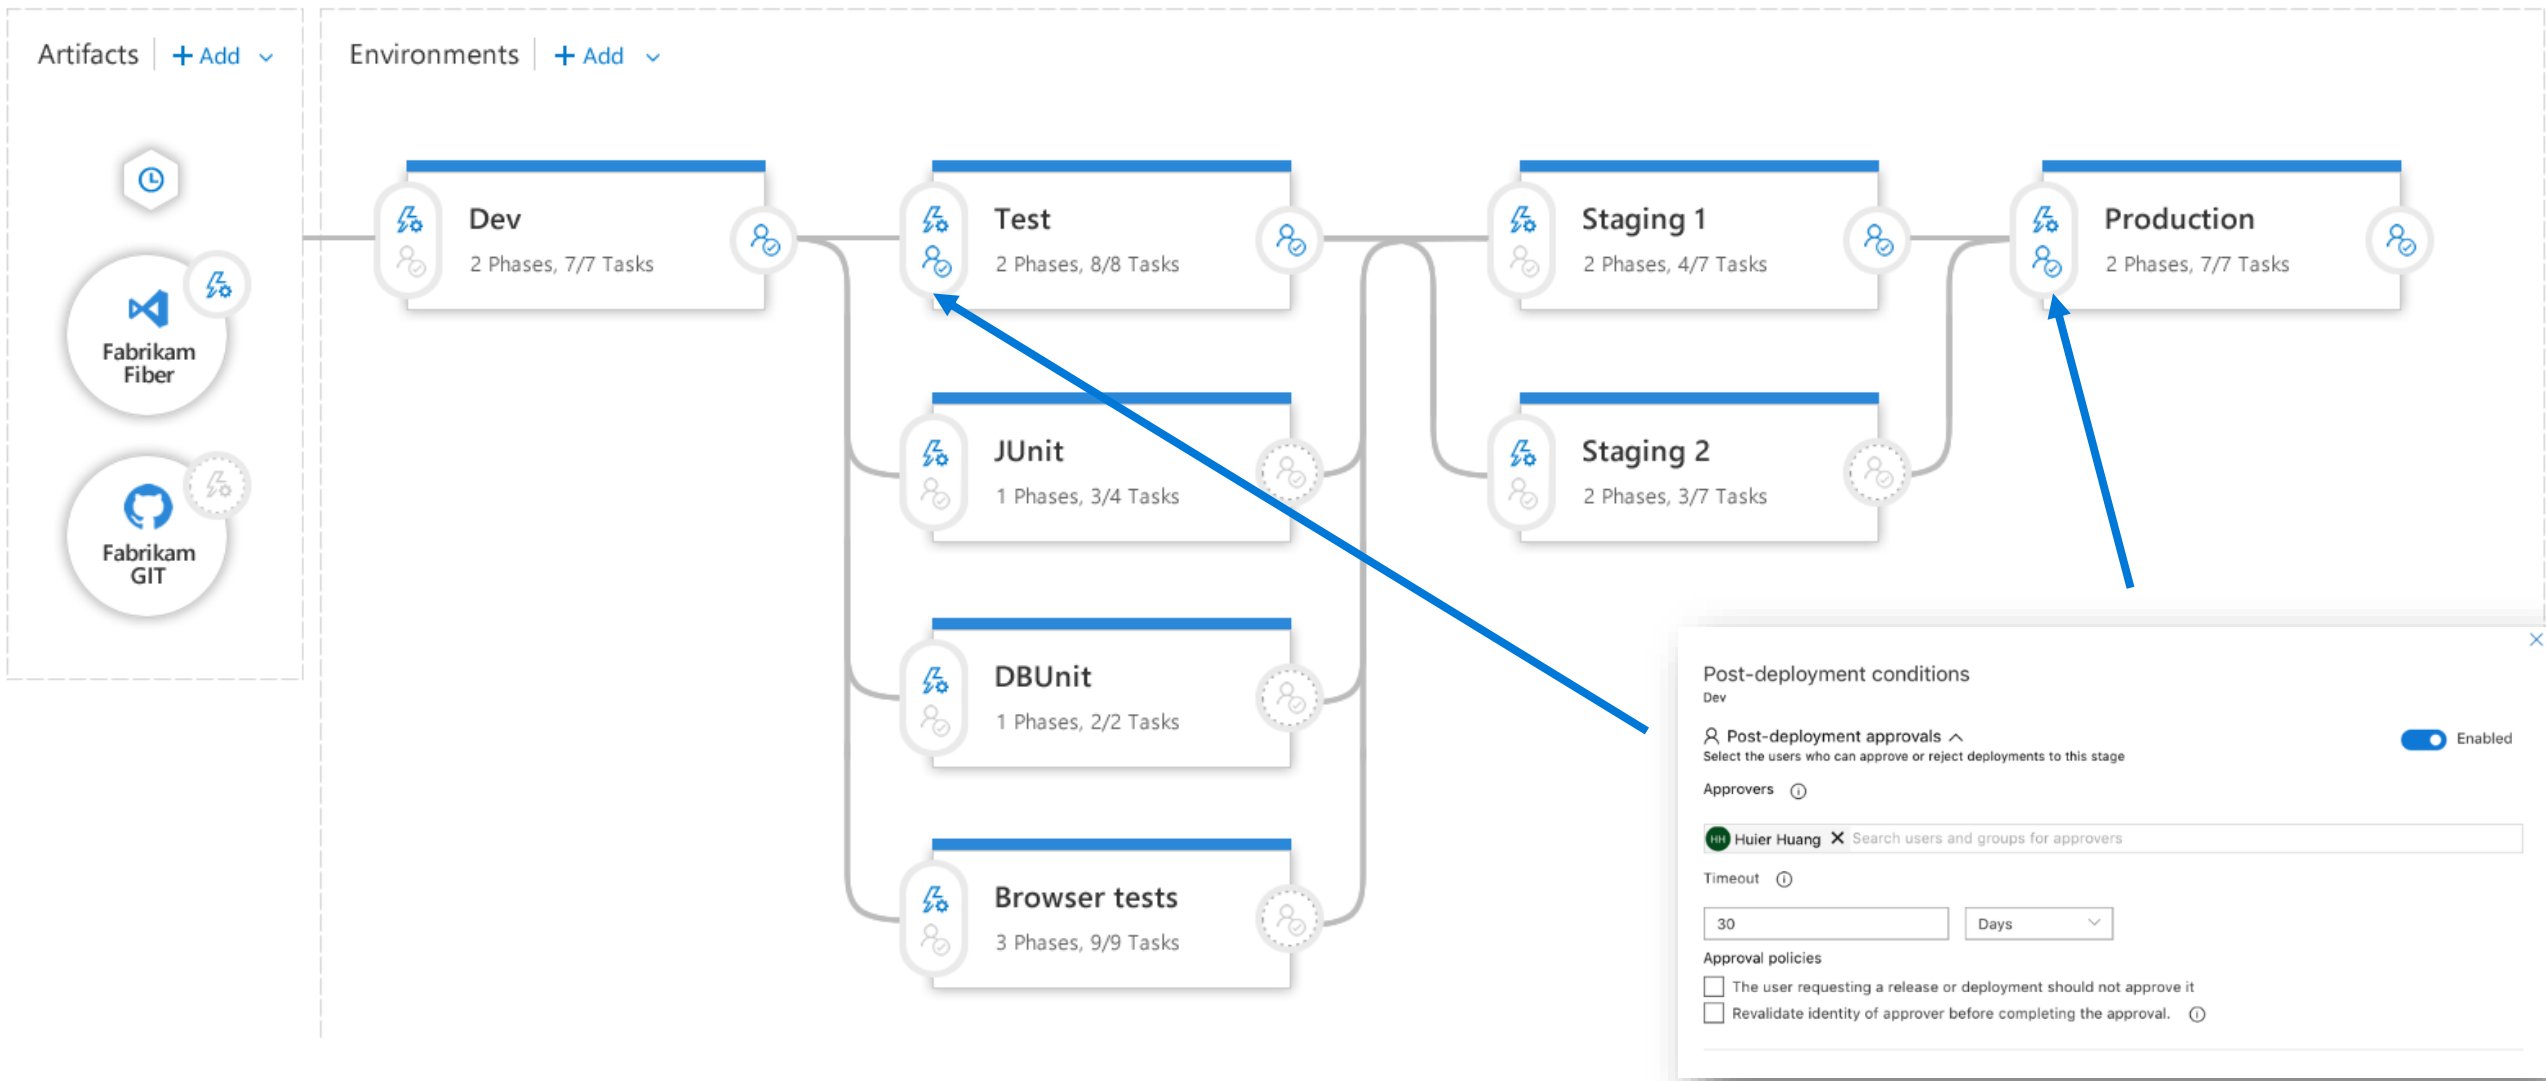

# 自動化過版三步驟

## 上線流程路徑

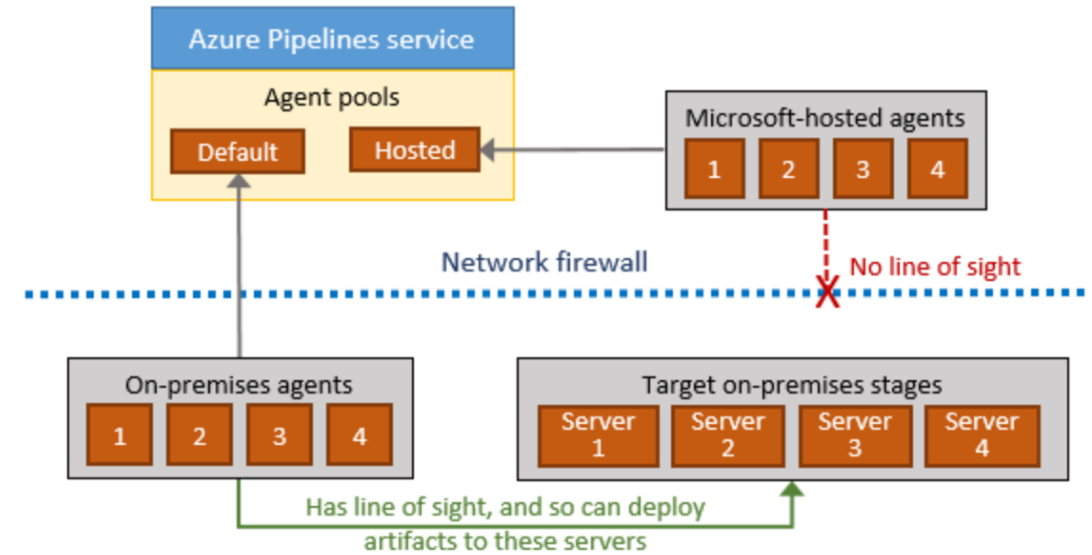

# Release Pipeline

## 自動化程式碼發佈流程

# Frequently Ask

- 可以部屬到地端嗎？
  - 可以
  - 分兩種做法：
    - 使用 Self host agent 為 release machine 當作跳板機
    - 於 target server 安裝 Azure DevOps agent
- 資料庫可以部屬嗎？
  - 可以

# Use Case

# .NET Core Web

## Microsoft DevOps Engineering Team

GitHub 和開發人員計劃工程團隊位於同一組織中，具有相同的領導能力。

專注於使用 GitHub 構建同類雲的最佳集成。

在 Azure 方案中對 DevOps 進行最佳知識共用。

# Automated Delivery – GitHub Action

Automating workflows from code to  
cloud

## Accelerate delivery through automation

Automation triggers for 20+ project events allows for automation beyond just CI/CD to any available API

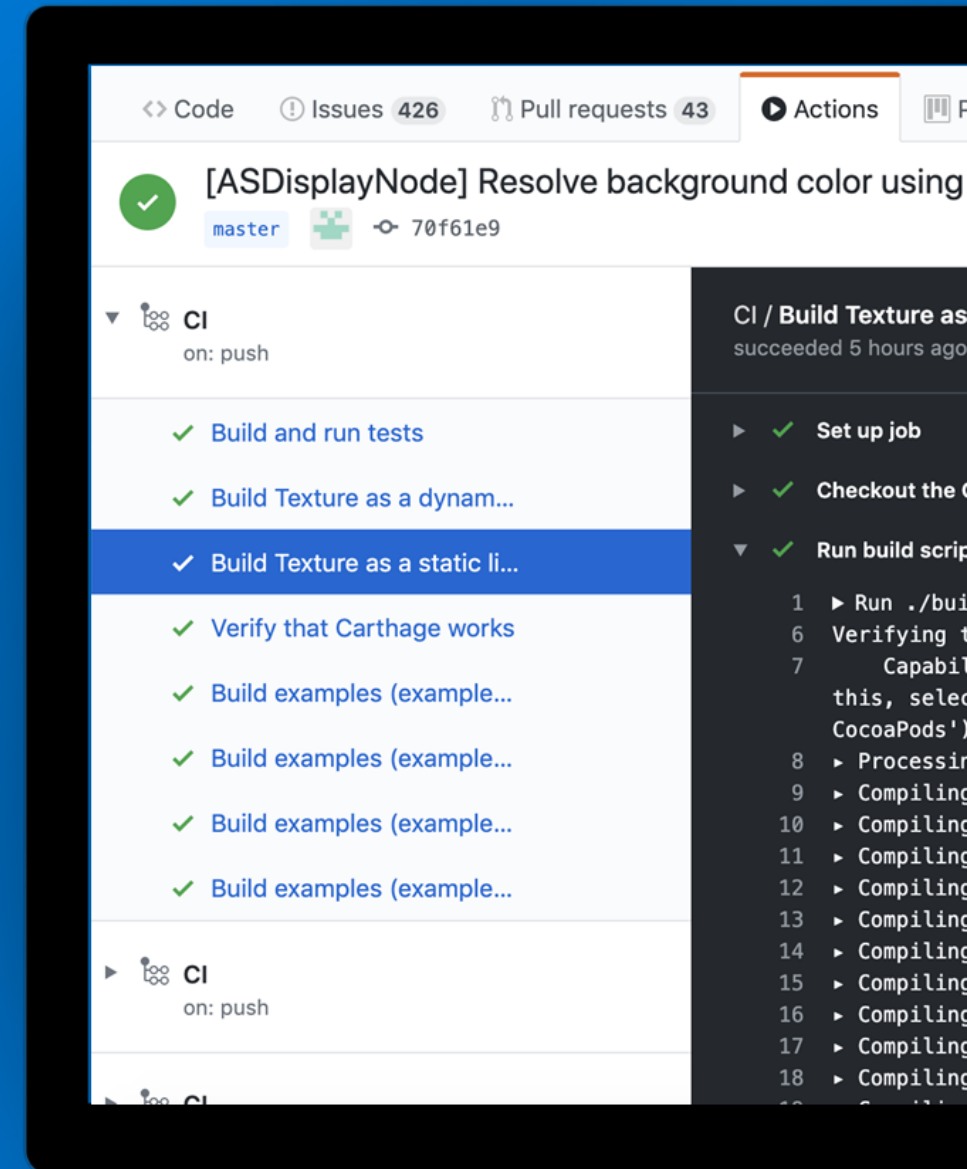

## Simple and easy to use

Configuration based on YAML with a host of sample workflows to learn from and get started

## Global community for actions

Thousands of open source Actions, maintained by the community and by companies offering integrations, including Microsoft Azure

# Let's Hands-on !
